

ACP Equipment is proud to represent the outstanding manufacturers listed below in order to provide our mining, aggregate, and industrial customers with the best possible classification and processing equipment.

For more information, visit us at www.acpequipment.com

FLSmidth/Krebs		Hydrocyclone separation equipment, millIMAX™ slurry pumps, manifold systems, Technequip valves, desanders, spiral concentrators, cyclone re-line & repair shop
Lister Bolt		Complete mill liner fastening systems including liner bolts, washers, seals, nuts and a patented washer/seal assembly
Schenck Process		US manufactured process screens: multi-slope banana screens, incline screens, horizontal screens & vibratory screens
Industrial Air Technology		Centrifugal fans and blowers
B. Deo-Volente, Inc.		Screening media: profile wire screens, carbon handling screens, inter-stage screens, cylindrical & curved screens
Tectron Metal Detection		Industrial metal detectors for superior tramp metal protection
Zabco		Engineered rubber & urethane screening and wear products; abrasion resistant materials, liners, & conveyor scraper blades
Stockton Rubber Mfg.		Custom and proprietary rubber products
Saint-Gobain Ceramics		Reaction-bonded silicon carbide wear materials
Goodman-Hewitt		Idlers, pulleys, wobbler return trainers, high-grade urethane sheets

ACP Equipment of Nevada, Inc. (ACP) is a privately held company established in 1989 to provide equipment and services to clients in the natural resources industries in Nevada, California, Utah, Colorado, Arizona, Idaho, and Montana. Our president, R. Wayne Carter, has more than 35 years of research and development experience working as an independent consultant and with companies that include Hazen Research in Golden, Colorado and Cyprus Metallurgical Processes in Tucson, Arizona. He has worked with local, state, federal, and international regulatory agencies including OSHA, BLM, EPA, MSHA, DOT and the United Nations dealing with compliance, permitting, and remediation issues.

ACP can provide on-site technical support for clients in conducting process evaluations and plant audits, assisting with the commissioning of new operations, and troubleshooting for existing operations. We can assist in designing and conducting sampling and measurement programs for in-plant technical investigations.

ACP's capabilities and expertise include:

- Flowsheet/Material Balance Preparation
- Financial Evaluations
- Cost Estimating & Analysis
- Plant & Pilot Plant Design, Construction & Start-up
- Plant Operations
- Project Management

Major projects have included:

- Design, construction, and operation of:
 - ✓ A mercury waste treatment pilot plant
 - ✓ A zinc ammonium chloride recovery plant
 - ✓ A gallium electrowinning circuit and germanium refinery
 - ✓ A gold and silver flotation/cyanide plant
 - ✓ A refractory gold process development
 - ✓ A high pressure autoclave system for investigating gold metallurgy and nickel laterite recovery
- Supervised the construction and start-up of a copper hydrometallurgical smelter demonstration plant
- Start-up superintendent for a 4,000 TPD agitation leach silver plant in Turkey
- Construction and operation of multiple hearth furnace systems
- Basic engineering design and construction overview of a petroleum coke combustion plant to produce vanadium ash in Venezuela
- Designed and constructed an insitu uranium surface plant
- Developed a process and designed a plant for recovery of scrap copper
- Established MSHA safety plans for several mines and milling operations
